SUMMARY

Front-end developer and digital solutions builder with 20+ years in IT and extensive experience creating responsive websites, landing pages, internal tools, and automated workflows. Skilled in JavaScript, HTML, CSS, WordPress, no-code tools (Webflow-ready, n8n, Power Automate), and modern frameworks like Next.js and Strapi. Strong background in UI layout, component development, integrations, and problem-solving within fast-paced agency environments.

Permanent remote professional with clear communication, autonomy, and a strong grasp of iterative delivery.

CORE SKILLS

Front-End Development: JavaScript, HTML5, CSS3, Tailwind, responsive/adaptive design
Frameworks: Next.js, React, Strapi, Node.js
No-Code / Low-Code: WordPress, Webflow (learning-ready), n8n, Power Automate, Airtable
Integrations: REST APIs, JSON, custom automation workflows
Design: UX/UI principles, Figma, Photoshop
Other: Git/GitHub, virtual collaboration, rapid prototyping

RECENT PROJECTS

Customer Portal 2.0 — Front-End & Strapi Development

Next.js • Strapi v5 • Tailwind

- Built and integrated front-end components for a Strapi-powered portal.
- Created clean, responsive interfaces and improved content structures.
- Streamlined content workflows for marketing and operations teams.

XML Processing & Automated Publishing Pipeline

Power Automate • REST APIs • Automation

- Built a fully automated ingestion → renaming → publishing flow for XML files.
- Eliminated manual file handling and ensured consistent delivery to a public library.
- Reduced processing steps from hours to minutes.

New Hire IT Request App

Power Apps • Automate

- Developed a full onboarding request application for IT & HR.
- Automated approval routing, task notifications, and provisioning steps.
- Increased reliability and reduced missed onboarding tasks.

WordPress Sites & Landing Pages (Ongoing)

WordPress • HTML/CSS • Custom Templates

- Built and maintained WordPress themes, templates, and landing pages.
- Improved layout consistency, responsiveness, and load performance.
- Managed DNS, hosting, plugin configurations, and client updates.

SharePoint Internal Tools & Department Portal

SharePoint • Front-End Customization

- Built user-friendly internal sites and dashboards for cross-functional teams.
- Improved navigation, permissions, and content clarity.
- Reduced internal support load through better UX.

RELEVANT EXPERIENCE

Digital Solutions Developer — Antech Diagnostics / Mars Petcare

Remote — 2010 to Present

- Developed front-end components, internal tools, and streamlined digital workflows.
- Designed and automated operational processes using n8n and Power Automate.
- Built UI layouts and prototypes in Adobe XD and Photoshop.
- Managed WordPress sites and content updates for global teams.
- Customized SharePoint pages, dashboards, and navigation experiences.
- Known for clear communication, independent problem-solving, and remote productivity.

Freelance Front-End Developer / WordPress Designer

2005–2010; ongoing

- Delivered end-to-end WordPress sites, landing pages, and marketing pages.
- Specialized in clean front-end execution and responsive layouts.
- Managed domain, DNS, hosting, and long-term client updates.
- Built custom HTML/CSS/JS components for small business sites.
